The Demand to Digitize Delivery Order Issuance

The ocean freight industry is (in)famous for its paperwork. As per the recent survey, it has been observed that more than 75% of the organizations face business risks and compliance related issues as a result of traditional paper based processes and sluggish workflows. Almost every phase in maritime operations requires compliance, document exchange, forms submitted which increases the administrative activities and the paperwork. On an average more than 40 documents and 120 copies are required in the maritime trade for shipment to move. One of the important documents in import trade is Delivery Order (DO) which is manual in nature, any delays in it may severely disrupt the supply chain.

Delivery Issues with Delivery Order

Stakeholder	Challenge
 Consolidator/ FF/ CB/ Importer	<ul style="list-style-type: none">▪ Multiple visits to Shipping Line office▪ Long wait queues at counters for document submission, payment and DO collection

Current Process

- Request for Delivery Order
- Submit document Pouch and Original BL
- Make invoice payment in cash
- Collect DO
- Check the validity of DO Submit DO to transporter
- Issues House DO for CONSOL

Stakeholder	Challenge
 Shipping Line	<ul style="list-style-type: none">▪ Manual documentation & verification process▪ Lack of clarity and transparency leading to delay in shipment clearance.

Current Process

- Verify the documents
- Generate paper invoice
- Collect the invoice charges
- Issues Master DO or Re-validate the DO

Stakeholder	Challenge
 Port / Terminal/ Empty Depot	<ul style="list-style-type: none">▪ Lack of Delivery Order information leading to delay in shipment clearance▪ Lack of clarity on import containers pick up leading to delay in Terminal Invoice & Payment clearance.

Current Process

- Receive DO from Trucker and verify
- Generate and collect the Terminal invoice charges
- Hand over the container/ cargo
- Empty return the container to Empty Depot and collect the hard copy of handover document.

Stakeholder	Challenge
 Transporter	<ul style="list-style-type: none">▪ No proper logs maintained which becomes a challenge for Invoicing

Current Process

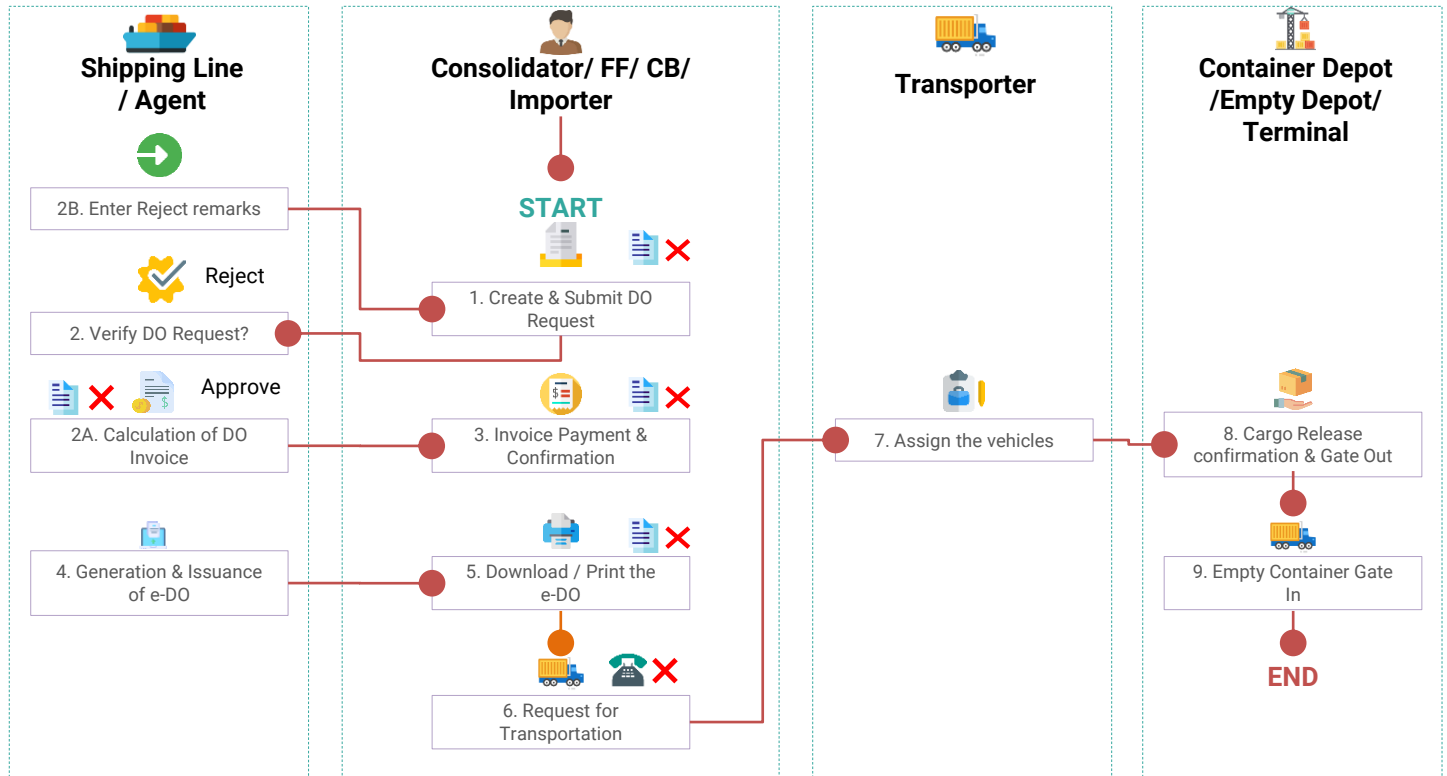

- Manual process for receipt of booking request is received through phone calls and emails.
- Vehicle Assignments are manually over phone calls or emails.
- Manual hard copy as confirmation or acknowledgment document for handover of Empty container.

Electronic Delivery Order for real-time delivery monitoring and seamless operations

Kale offers electronic generation of the Delivery Order (DO) from anywhere-anytime with an online payment mechanism. This secured and single platform has the ability to issue DO for multiple carriers and has the ability to validate expired/soon to expire DO with auto-calculation of charges. The platform has the capability to issue Master and House DO to different stakeholders.

Unique Functional Capabilities

Real time visibility of Delivery Orders released in a secured manner by respective carrier

Ability to issue DO for multiple carriers on a single platform

Hassle free and password protected secure transactions

Efficient financial transactions through auto calculation of DO fees and e-payment options

Online re-validation of expired/soon to expire DO

Business Benefits

Secured & authorised view of DO to value chain stakeholder

Paperless transactions to eliminate possibility of error

Hassle free and password protected secure transactions

Reduced waiting time in clearance process

Faster revenue realisation with online payments

Success Stories

The e-Delivery Order module has been implemented majorly across Asia Pacific Region such as Thailand, Bangladesh & India.

About Port Community System - CODEX

CODEX is a UNESCAP and ADB award winning innovative platform developed to not only bring together the stakeholders of the maritime sector onto a single platform but also facilitate government-to-business, business-to-government and business-to-business transactions in a highly secured environment. Customs, forwarders, shippers, shipping lines, terminal operators, inspection agencies, hauliers and railway operators – all of these, and more, need access to smart, real time information. The platform provides the business community with a streamlined process for submitting export and import information to customs and other government agencies.
